CIVIL DEFENSE MICROFILMING PROJECT

Birth Index Cards: 1951-1953 incl.

PURPOSE

To microfilm Birth Index Cards for Civil Defense purposes, that is, to store the micr-film in a secluded area free from "zone zero" and if disaster occurs to immediately set up a duplicate index card file using photographic paper as the card, the card image made from the microfilm. The film will be stored at Deers Head Hospital, Salisbury, Maryland.

The cards were filmed rather than the certificate because:

(1) Index cards are more adaptable to the automatic feed and all the essential data are shown thereon.
(2) Index cards would take approximately 1/3 the microfilm, the index card being 3" as against the certificate measuring 7¼".
(3) The issuance of certified copies can continue as usual.
(4) Microfilm reference by soundex is faster in that 10 years may be found together.

PROCEDURAL DATA

It has been determined that on 100 feet of microfilm approximately 6000 3" x 2¼" index card images can be taken at a reduction of 23 to 1.

To average five Microdex points (sections) for each 100 foot of microfilm there will be approximately 1300 birth index cards between microdex points. Also, to keep card handling to a minimum four microdex guides (stops) will be inserted within each drawer.

In order to facilitate finding a certain index card on the film within the stops, the drawer (and in turn the film) is divided into four sub-divisions which will be noted from the microdex file separators.

For example: Alexander, Theodore Sigmond
Gerald & Vera DeKowzan
Soundex Code number is 425

Therefore, referring to outside of film container it would be found after Microdex 2, Microdex guide (stop) and after the third microdex "file separator."

MICROFILMING PROJECT - SOUNDEX RULES

HAVING DETERMINED SURNAME:

1. INITIAL LETTER REMAINS FIXED.

2. CONSONANTS ARE TRANSLATED INTO 6 FIGURES.

B, F, P, V	1
C, G, J, K, Q, S, X, Z	2
